Editor's Note

Dear readers,

"To me, the greatest pleasure of writing is not what it's about, but the inner music the word make".

-Truman Capote

In agreement with the above quote, I find writing is the most valuable literary expression. Our **WAJEEHAN** authors have put across some amazing piece of writing displaying their creative thinking and writing skills. It is actually a lovely experience to see these enthusiastic writers voicing their feelings through poems, verses, facts, riddles etc...

We are thankful to our blooming writers who have responded to all our call and send their ideas for this **AURORA 2022-2023** and I would like to extend my sincere thanks to our guiding staff members, editorial board, all teachers and my fellow students.

Finally, from the entire team of **"THE AURORA"** we wish all the readers a **HAPPY READING**.

"Education is the passport of the future, for tomorrow belongs to those who prepare for it today"

**-Malcom.X

That haram relationship,
That cursing tongue,
That gossiping mentality,
That materialistic love,
That disrespectful attitude,
That lustful gaze,
That greedy appetite,
That neglected Salah,
That dirty pride
Are not befitting a true Believer.
Where is your Salah?
Your fasting?
Your Quran?
Your manners?
Your honour?
Your good intentions?
Your attractive modesty?
Your kind tongue?
Your humbleness?
Your sincere love?
Your grateful heart?
Your love for Deen?
Your generous smile?
Your charming character?
Oh Muslim, where are you?

Success

If you want to make a success out of anything in your life, then you need to stop focusing on people, and strive to do what you know is best for you and what pleases Allah the most. You need to focus on yourself, your man, your physical wellbeing, and your mental health. The path to success is a personal journey between you and Allah.

THE CAKE OF FRIENDSHIP

Preheat the oven of love
With plenty of secrets and joys

Mix giggles, laugh and sorrow

Don't add thanks or sorry
That make your cake crack
Decorate it with frosting of trust
This is really a must
Enjoy the cake, do not eat it fast
Just like your new friendship, make it last forever

M.I Rafeeka
I B.Sc Computer Science

RIDDLES

1. There is a clerk at the butcher shop, he is five feet inches tall, and he wears size thirteen Sneakers what does he weigh?
 - meat
2. What can provide food while it is alive and after it's death?
 - chicken
3. What has a green top, red on it's belly, seed on the outside, and tastes great in jelly?
 - strawberry
4. What type of drink is usually added to cereal in the morning?
 - milk
5. I ate one and threw a way two?
 - ovster

6. This chocolate baked good is a soft candy made from sugar, butter, milk or a cream?

- fudge

7. This is a baked dish of fruit or meat and vegetables typically with a top and base of pastry?

- pie

8. I am a shiny metal sheet that covers BBQ food. Who am I?

- aluminum

9. I'm usually served alongside burgers. I am crispy golden potato sticks?

- fries

10. This baked dish consists of an open-topped pastry case with a savory or sweet filling?

- flan

M.SUNDARASWARI

I B.Sc. Computer Science

Science Facts

1. There is enough DNA in the average person's body to stretch from the sun to Pluto and back — 17 times.
2. The average human body carries ten times more bacterial cells than human cells.
3. It takes a photon up to 40,000 years to travel from the core of the sun to its surface, but only 8 minutes to travel the rest of the way to Earth.
4. At over 2,000 kilometers long, The Great Barrier Reef is the largest living structure on Earth.
5. There are 8 times as many atoms in a teaspoonful of water as there are teaspoonfuls of water in the Atlantic Ocean.
6. The average person walks the equivalent of five times around the world in a lifetime.
7. When Helium is cooled to almost absolute zero (-460°F or -273°C, the lowest temperature possible), it becomes a liquid with surprising properties: it flows against gravity and will start running up and over the lip of a glass container.
8. If Betelgeuse (the star) exploded, transitioning from the red supergiant stage to supernova, it would light our sky continuously for two months. And it could happen anytime — within a couple of thousand years, tomorrow or even now.
9. An individual blood cell takes about 60 seconds to make a complete circuit of the body.
10. The known universe is made up of 50,000,000,000 galaxies.

P.Akila

II B.Sc Computer Science

RIDDLES

1. What has a neck but no head?

Answer: A Bottle.

2. What is the end of the rainbow?

Answer: The letter 'w'.

3. I can fly, but I have no wings I can cry, but I have no eyes who am I?

Answer: Cloud.

4. What is the hottest day during summer?

Answer: Sun-Day.

5. Why six afraid of seven?

Answer: Because seven eight (ate) nine.

6. Why is river rich?

Answer: It has two banks.

H.Rizwana.

II B.Sc. Computer Science

RIDDLES

1. What has a thumb and forefingers but it isn't alive?
2. What has 88 keys but can't open a single door, what is that?
3. We are two brothers on opposite sides of the road, but never see each other who are we?
4. How many seconds are there in a year?
5. What kind of room has no doors and windows?
6. I am right I am never wrong what I am?
7. What starts with a P, end with an E and has 1000 of letters?
8. What lives when it eats and dies when it drinks?
9. What three letters word can you take away 2 of the letters and it's still says the same thing?
10. What goes up when rain come down?

ANSWERS

1. A Gloves
2. Piano
3. Eyes
4. 31,536,000 seconds in a year
5. Mushroom
6. Angle
7. Post Office
8. Fire
9. Queue
10. Umbrella

7 RULES FOR LIFE

1. Make peace with your past So it doesn't spoil your present
2. What other's think of you is none of your business
3. Time heals almost everything give the time, some time
4. No one is there as one of your happiness except you yourself
5. Don't compare your life with others, you have no idea what their journey is all about
6. Stop thinking too much it's alright not to know all the answers
7. Smile, you don't own all the problems in the world

H.Sameeha Sahar Banu

I B.Sc Computer Science

the graduation

do not be afraid
of the openness of the earth.
do not be afraid
to scatter parts of yourself to the wind and
see where they land.

for today you must make a new thing
outside of school notebooks and
classroom walls.
you will no longer fit neatly
inside lines, perfectly in rows,
and that is the greatest challenge:
to create yourself with no limitations.

do not fear
the magnitude of your dreams.
for at any given time, the big wide world is
half asleep, dreaming up a new morning.
have the courage to rise
like the sun does every dawn—
knowing this
is your
new beginning.

-Fathima.S (IT-3RD YEAR)

A SWEET FAREWELL

*Strangers once we were and then
It started with a simple "Hi!"
And now, that fateful time is here
When we all have to say goodbye.*

*The time that we spent was more than just
A series of memories made
We learnt what it meant to trust someone
And every "I'm with you!" is enough said.*

*We don't know what the future holds
But our lives are about to completely change
But this isn't the end of the book
All we're doing is turning a page.*

*The time was ours and together we were
I could not be more elated that we met
Parties, trips and birthday treats
We did it all and now there's no regret.*

*We wish that we'd met sooner
It's a little too early for us to part
Nevertheless, we've been bound now and forever
Yes. We know it in our hearts.*

*We all have aspirations and our dreams
And so as we walk towards those final gates
A tear in the eye, yet a smile on the face
Now for us, a new journey awaits.*

-Fathima.S (IT-3RD YEAR)

WE ARE BEST FRIEND

We are best friend,
No matter how deep your Secret is,
Though your thoughts run wild to conceal,
Yelling at me not to seek,
Remember, I'll never stop, until I learnt your secrets,
Thoughts and sadness.

We are best friend,
Your eyes told me how you feel, your talking
tells me where your Situation is
Because I learnt your diet sometimes, you make my day
And bitter my days by your action.

We are best friend; remember I am not in a mood
To see your sadness,
So, share your sadness, because, when you cry, I cry in secret
And sad, when you are sad
Laugh, when you laugh with your Heart contents.

We are best friend
No matter how hard it would be to cease
what I really wanted to do.
But if you really despised it,
express it with your words,
because we are best friend.

We are best friend.
Even in my darkest moment, I'll stood by your sides
If you are angry at me, I'll beg and beg until you forgive me.
Cuz I'm scare to lose a friend like you.
That makes my day andgavemehopewithawords.
BESTOFTHEBESTFRIEND!!

-Fathima.S (IT-III YEAR)

MY SWEET JUNIOR

My sweet junior,
Today is your day,
The first of many steps
As you journey on your way,
Your future is filled
With amazing possibilities.
So chase your dreams,
Embrace the opportunities.
And those times when life throws you curve
balls,
Always remember.
I'll be there when you call

-Fathima.S (IT-III YEAR)

Chat GPT- An AI Language Model Revolutionizing Conversational Interactions

Introduction:

ChatGPT, an advanced AI language model developed by Open AI, has made significant strides in transforming the landscape of conversational interactions. With its natural language processing capabilities, extensive knowledge base, and ability to generate contextually relevant responses, ChatGPT has become a powerful tool for communication, information retrieval, and creative exploration.

Unleashing the Power of Conversational AI:

ChatGPT harnesses the power of deep learning and large-scale language models to understand and generate human-like text. Trained on a vast corpus of diverse data, including books, articles, and websites, ChatGPT has acquired a broad knowledge base, allowing it to provide informative and engaging responses across a wide range of topics.

Seamless Conversations:

One of ChatGPT's notable strengths is its ability to engage in seamless conversations with users. By processing user inputs and generating coherent and contextually appropriate responses, ChatGPT creates a natural and interactive conversational experience. Whether it's answering questions, providing explanations, or engaging in open-ended discussions, ChatGPT adapts to various conversational styles and user needs.

An Evolving Understanding:

ChatGPT continuously learns and adapts through a process known as "fine-tuning." OpenAI employs advanced techniques to improve the model's responses and address limitations. Feedback from users plays a crucial role in this process, allowing ChatGPT to refine its understanding, rectify mistakes, and better align with user expectations over time.

Applications in Everyday Life:

ChatGPT's versatility has led to its integration into various

domains. From customer support chatbots to virtual assistants and content generation, ChatGPT finds applications across industries. Its ability to comprehend and respond to natural language queries makes it a valuable tool for information retrieval, research, and learning.

Ensuring Responsible and Ethical Use:

OpenAI recognizes the importance of responsible AI deployment and the potential risks associated with its misuse. In order to address concerns, OpenAI has implemented safety measures, including content filtering and user interaction guidelines, to prevent the generation of inappropriate or harmful content. These steps aim to ensure the responsible use of ChatGPT while promoting a positive and beneficial user experience.

The Future of Conversational AI:

ChatGPT represents a significant milestone in the field of conversational AI, demonstrating the potential for AI language models to enhance human-machine interactions. OpenAI's ongoing research and development efforts continue to push the boundaries of AI capabilities, aiming to improve the accuracy, contextuality, and overall user experience.

Conclusion:

ChatGPT, OpenAI's groundbreaking AI language model, has revolutionized conversational interactions. With its ability to understand and generate human-like text, ChatGPT provides users with an engaging and informative conversational experience. As AI technology continues to advance, ChatGPT and its successors hold the potential to transform the way we communicate, learn, and interact with intelligent systems, opening doors to new possibilities and opportunities.

II BSc.InformationTechnology

The Power of Social Media: Connecting People and Enabling Communication

The way we communicate, connect, and share information has been revolutionized by social media. Platforms like Facebook, Instagram, Twitter, and LinkedIn have become vital elements of our daily lives, with billions of active users worldwide.

Social media platforms have crossed geographical boundaries,

allowing people from all over the world to easily connect. We can contact with those who are close to us regardless of their actual location with a few mouse clicks. We can maintain relationships, convey information, and celebrate anniversaries with loved ones via social media, overcoming the limits of distance and time zones.

Social media platforms enable people with similar interests to interact and build communities. Whether it's through Facebook groups, Twitter chats, or LinkedIn professional networks, social media allows us to connect with like-minded people, exchange knowledge, and work together on projects. These communities enable interactions, learning, and provide support networks.

Individuals now have a platform to express themselves and fight for social change with the help of social media. Social media has promoted mass gathering and boosted awareness about key causes through hashtags, viral campaigns, and online activism. It has evolved into an effective instrument for achieving social justice, generating debate, and holding institutions accountable.

Social media changed the way businesses interact with clients and sell their goods and services. Platforms such as Instagram, YouTube, and LinkedIn allow businesses to reach a larger audience, connect with customers directly, and establish brand loyalty. Social media marketing has evolved into an important component of business plans, allowing for focused advertising, customer feedback, and useful market information.

The power of social media in connecting people and enabling communication cannot be overstated. These platforms have changed the way we communicate by breaking down barriers, building communities, and boosting voices. From personal relationships to global conversations, social media has altered the way we communicate, interact with information, and traverse the world. Proper use of its potential can result in meaningful interactions and a beneficial societal influence.

MI Mohudoom (BSc IT II year)

Artificial Intelligence (AI)

Introduction:

In recent years, the rapid advancements in artificial intelligence (AI) have captivated the imagination of researchers, businesses, and society at large. AI, a multidisciplinary field that focuses on creating intelligent machines capable of performing tasks that typically require human intelligence, has gained immense popularity and is revolutionizing numerous industries. This article explores the

profound impact of AI across various sectors and delves into its potential to reshape the future.

The Rise of Intelligent Automation:

One of the key applications of AI is intelligent automation, which combines machine learning, natural language processing, and robotics to automate complex tasks. AI-powered automation has transformed industries such as manufacturing, logistics, and customer service by streamlining operations, increasing efficiency, and reducing costs. From autonomous robots in factories to virtual assistants responding to customer queries, AI is driving unprecedented levels of productivity and transforming traditional workflows.

Enhancing Healthcare and Biotechnology:

AI is ushering in a new era in healthcare and biotechnology, revolutionizing diagnostics, drug discovery, and personalized medicine. Machine learning algorithms are being developed to analyze vast amounts of medical data, aiding in the early detection and diagnosis of diseases. AI-powered robotic systems are assisting surgeons in complex procedures, improving precision and reducing the risk of errors. Moreover, AI is accelerating drug discovery by rapidly analyzing molecular data and identifying potential therapeutic candidates, leading to faster development of life-saving treatments.

Smart Cities and Sustainable Development:

AI is playing a pivotal role in building smart cities and promoting sustainable development. By harnessing the power of AI, cities can optimize energy consumption, manage traffic flow, and enhance public safety. Intelligent systems can analyze data from various sources, including sensors and cameras, to identify patterns and make informed decisions. This enables efficient use of resources, reduced pollution levels, and improved quality of life for citizens. AI-driven solutions are also being leveraged to address climate change challenges, aiding in environmental monitoring, prediction of natural disasters, and development of sustainable solutions.

Revolutionizing Finance and Banking:

The financial industry is undergoing a transformative journey with AI at its core. Machine learning algorithms are being used to detect fraudulent activities, assess credit risk, and automate investment decisions. Natural language processing enables chatbots and virtual assistants to provide personalized customer experiences, enhancing engagement and satisfaction. AI-powered algorithms can analyze vast amounts of financial data, identifying patterns and trends to inform strategic decision-making. This technology has the potential to make financial services more accessible, efficient, and secure.

Ethical Considerations and Future Implications:

While AI holds immense potential, ethical considerations must be addressed to ensure its responsible deployment. Issues such as bias in algorithms, privacy concerns, and the impact on the workforce need careful attention. It is crucial to establish regulations and guidelines that promote transparency, fairness, and accountability in AI systems. Additionally, ongoing research and collaboration between policymakers, researchers, and industry leaders are necessary to harness AI's potential while mitigating potential risks.

Conclusion:

Artificial intelligence is transforming industries and reshaping the future in unprecedented ways. Its applications span across sectors, from healthcare and finance to manufacturing.

VIDEO EDITING

Video Editing is really important skill to have, especially if you want to create high-quality content. There are a lot of different tools and techniques you can use to make your videos look more polished and professional. “Video Editing” is a really fun and creative process. It’s a great way to express your ideas and bring your vision to life. There’s also a lot of satisfaction that comes from seeing your finished product and knowing that you put in the work to make it look great. It is a great way to tell a story and create engaging content. It allows you to be creative an experiment with different techniques to bring your vision to life. Video Editing can be a fun and rewarding process that allows you to express yourself and share your ideas with others.

The Moon and I

I took a ride on this lonely highway
Murky appears its night, cold its wind.
And my Solitude, it plays deep within.
This darkened sky,
I keep looking at it.
And I search for you everywhere
I hope you will come, to keep me company
I believe you will heal, my wounded soul.
But where are you? I find you nowhere
Is it that you are angry?
Or is it that, you too are devoid of love for me?
Least come, show your angry face once!

Ah, there you are
Dodging beneath the cloak of clouds?
Playing with me, hide and seek.
I know our bond is too deep to deviate
I know our love is far able and can't alter
Oh, my dear "the princess of night's sky"
Shed your shyness and come here back with me.

A. AFRIN JISHAII
I BSc.IT.

“GOOD BYE”

It's been a long time since you left
But it took me a while to accept
I have to let go of your hand
Thank you for the memories
Even if some bring pain
And if you ever think of me,
I hope the thought won't cause you distain
Thank you for brightening up my life
With the sweet sound of your laughter
May you find the person you've always dreamed of
and live Happily Ever After

I AM DOING IT FOR ME...

I'm saying no...

When I used to say yes, to protect my peace.

I'm choosing to put my goals at the top of my priorities,

Because I deserve to reach them.

I'm starting to trust myself every day as I am keeping the promises I make

To myself.

I am no longer allowing others to control my emotions and actions, and this may mean ending relationships.

I hope you know this has nothing to do with you or anyone else, but that I need to do this for me.

Nation

A nation is a people United by a
common bond
They may speak different tongues
But they share a common land

A nation is a family
With its own history and culture
They may have different briefs
But they stand together in the face of danger

A nation is a dream,
A nation of a better future
It is a place where everyone can be free
Where everyone can be equal

A nation in a work in progress always
striving to be better
It is a place where people can come together,
To build a better world for all

Women

Women, you are the light of the world,
The warmth that keeps us from cold.
You are the strength that we learn on,
The love that makes us whole.

You are the mothers who give us life,
The sisters who share our strife.
You are the wives who make our homes,
The friends who see us through our storms.
You are the teachers who guide us.
The nurses who care for us.
You are the leaders, who inspire us,
The artists who shape our world.
You are the women who make us better,
The women who make us whole.
You are grateful for your strength,
You love, and your grace

கவிதை

அம்மா

உனக்காக கவிதை எழுத எண்ணினேன்
தீர்ந்தது எனது பேனாமையும்
புத்தகங்களும் மட்டுமே. நான்கு
எழுத்தில் "உலகம்" என உச்சரித்தேன்

மூன்று எழுத்தில் "அன்னை" என
அழைத்தேன். இரண்டு எழுத்தில் "தாயே"
என எழுதினேன்.

ஓர் எழுத்தில் எழுத எண்ணினேன்
வரவில்லை எனக்கு வார்த்தைகள் கீழே
"ஆ" என அழுதேன் ஓடி வந்தால் என்
அன்னை.

அப்போது தான் உனக்கு அப்படியும் ஒரு
பெயர் உள்ளது என தெரிந்தது... நான்
பிறக்கும்போது உன் தொப்புள்
கொடியை வெட்டியது நம்மை பிரிக்க
அல்ல... என்னை பெற்ற உன்னை
பாராட்டி வெட்டும் ரிப்பன் "அம்மா"...
